

Quality of Life Home Improvement Questionnaire

If you answer: YES to one or more of these questions, installing the Air Scrubber by ActivePure in your home could help improve your quality of life.

Are airborne irritants a problem in your household?

☐ YES☐ NO

Do you ever smell cooking odors, pet odors, or smoking odors in your home?

☐ YES☐ NO

Do you ever smell musty smells in your home?

☐ YES☐ NO

Would you like to reduce dust, mold, pet dander, or pollen in your home?

☐ YES☐ NO

Air Scrubber

BY ACTIVEPURE®

The Air Scrubber by ActivePure attaches directly to the HVAC system ductwork to help reduce many common types of bacteria, viruses, and other contaminants in indoor spaces.

Around-the-Clock Protection for Your Indoor Spaces

Explore the ActivePure® Technology Difference
Advanced air purification technology.

Around-the-Clock Protection
Our proprietary ActivePure Technology works to protect your HVAC system and indoor spaces.

Proven Efficacy in Both Laboratory Studies and Real-World Settings
ActivePure Technology is proven to reduce airborne contaminants.

High Standards for Air & Surface Protection

Disinfect

REDUCE CONTAMINANTS

Do you worry about what is being brought into your home or business? Contaminants are collected on our hands, clothes and shoes; landing on doorknobs, counter tops and floors as we move through indoor spaces. Air Scrubber by ActivePure contains ActivePure Technology. This advanced technology scrubs and purifies the air you breathe by reducing up to 99.9% of many common airborne contaminants.¹

Purify

REDUCE PRESENCE OF IRRITATING PARTICLES

Dust, mold, pollen and many other pollutants can be a cause of irritation. These contaminants can be reduced with the Air Scrubber by ActivePure. ActivePure Technology uses specialized light waves along with a proprietary catalytic process that creates scrubbing molecules of oxygen and water molecules which purify the air and reduce the particles that can cause irritation.

Deodorize

BANISH LINGERING ODORS

There's not much you can do to prevent some of life's odors, but now there's something you can do to neutralize them. Working through your heating and air conditioning unit, the Air Scrubber by ActivePure is a photohydrolic device that can significantly reduce dust, pet dander and odors in your living environment. You will be able to reduce common smells such as garbage, pet odors, cigarette smoke, paint and the musty smell from mold and mildew.

Protect

EXTEND THE LIFE OF YOUR HVAC SYSTEM

Air Scrubber by ActivePure can extend the life of your existing heating and air conditioning system by helping improve the efficiency of your HVAC system's return air filter. Preventing dust and debris from bypassing the filter and damaging the coils and blower can keep your system running effectively. A protected HVAC system can last longer, save you money on your utility bill and reduce the need for expensive service calls.

Quick Facts:

- Uses ActivePure Technology to help reduce many common types of bacteria, viruses, and mold in indoor spaces¹
- Provides air purification without the use of ozone
- Protects your heating and cooling system from potential buildup
- Installed by a professional directly into the existing HVAC system ductwork
- Discreet or concealed installation
- Requires only 17 watts of electricity
- Proven effective in homes, businesses, schools, public facilities, healthcare facilities, athletic facilities, hotels, meeting spaces, and more¹

Weight & Dimensions

- 3 lbs (1.4 kg)
- 6.5" H x 6.5" W x 2.2" D (16.5 cm x 16.5 cm x 5.6 cm)

Cell Dimensions

- 2.3" H x 2.3" W x 9.1" D (5.7 cm x 5.7 cm x 22.9 cm)

Coverage

- Up to 2,000 sq. ft. (185 m²) with uniform air diffusion; not to exceed 3,000 sq. ft. (279 m²).¹

Warranty

- Limited lifetime warranty on unit; 2 year warranty on ActivePure Cell Assembly

- Meets California ozone emissions limit: CARB certified

- Validated to UL 2998

- Made in the USA with domestic and globally sourced components.

Discover the Power of ActivePure® Technology

WHAT IS ACTIVEPURE® TECHNOLOGY?

- ActivePure is an advanced Photohydrolysis technology that inactivates contaminants in the air
- ActivePure Technology works with your existing HVAC system to help neutralize contaminants and volatile organic compounds (VOC gases) as they enter an indoor space, providing a layer of purification that reduces airborne contaminants

HOW CAN IT HELP YOU?

- ActivePure Technology reduces up to 99.9% of many common types of bacteria, viruses, and mold in the air.¹
- Works around-the-clock to protect indoor spaces from airborne contaminants
- Reduces irritants in the air
- Purifies the air in any indoor space, without the use of ozone
- Reduces VOC gases, smoke and odors in the air

ActivePure® Technology does not replace the need to follow public health guidelines and should be used as complementary technology.

PROOF IT WORKS

In extensive unaffiliated lab testing, ActivePure Technology has been proven to significantly reduce numerous contaminants and pathogens, including the following¹:

- | | | | |
|---------------------------------------|---------------------------------|--|-------------------------------------|
| • <i>Aspergillus niger</i> endospores | • <i>E. coli</i> | • MRSA | • SARS-CoV-2 |
| • <i>Aspergillus versicolor</i> | • <i>Erwinia herbicola</i> | • MS2 Bacteriophage | • <i>Salmonella enterica</i> |
| • <i>Bacillus globigii</i> | • H1N1 Influenza | • Murine Norovirus | • <i>Sclerotinia sclerotiorum</i> |
| • <i>Botrytis cinerea</i> | • H5N8 Influenza | • <i>Mycobacterium tuberculosis</i> (TB) | • <i>Staphylococcus aureus</i> |
| • <i>Candida auris</i> | • <i>Legionella pneumophila</i> | • PhiX-174 | • <i>Staphylococcus epidermidis</i> |
| • <i>Clostridium difficile</i> | • <i>Listeria monocytogenes</i> | • Respiratory Syncytial Virus (RSV) | |
